Election/Restrictions

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 10 and 11-14, drawn to “A non volatile content addressable memory”, classified in class 365, subclass 49.
 - II. Claims 5-9 and 15, drawn to “A method of searching a binary word”, classified in class 711, subclass 108.
 - III. Claims 16-17 and 18-20, drawn to “A memory comprising a plurality of transistors”, classified in class 365, subclass 72.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of I or II or III have different modes of operation and different effects.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II as well as the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
